

Awnings 2011

Your caravan, only better...

After your caravan or motorhome an awning is probably the next most important investment to make to ensure a fantastic holiday and enjoyment of the great outdoors

A good awning should provide practical extra space but at the same time be a stylish addition that you are proud of and that enhances the sense of well being from simply getting away from the stresses and strains of everyday life

Pyramid recognises all of this and continues to push the boundaries of awning design and innovation within a value for money package, the pages of this brochure represent the culmination of this years efforts

Innovation

Product development remains a priority at Pyramid, our in house development team are always looking for new ideas to enhance our customers experience and enjoyment of our products. From the simple yet incredibly effective tension peg through to new and cutting edge fabric technology, innovation is at the heart of everything we do

Value

Cutting edge design and the latest innovations are all well and good but not if the price means they can't be enjoyed by the majority. All our awnings represent excellent value for money when compared to others available

Design

At Pyramid we recognise that everyone's requirements are different, because of this we have designed our range to allow personal preference to play a part in the purchase decision. We're confident we have a shape, style, size and colour of awning to suit everyone

Quality

Product quality is a primary focus for everyone at Pyramid. Rigorous controls at our ISO 9001 manufacturing facility ensure that all awnings are ready for use straight out of the box. On the rare occasions that a customer experiences a problem with a Pyramid product you can rest assured that our after sales team will deal with the matter in a professional and considerate manner

Design Influence

Built in 315AD the arch of Constantine was used as the victory entrance to the Colosseum in Rome, it's classic design was used as the basis for the Arc de Triumpe in Paris, Marble Arch in London and Union Station, Washington DC. Now, nearly 1700 years later it provides the inspiration for Pyramid's new arched awning

Constantine

**NEW
FOR
2011**

If seasonally pitching must be used in conjunction with the seasonal pitch frame and NOT the touring frame

In the event of extreme weather Please note we do call this an SPA or Seasonal Pitch Awning but due to the nature of British weather where we can, occasionally, get tornados and hurricanes we do not suggest using this awning all year around and discretion should be used when leaving the product unattended, ie is the caravan and awning sheltered or exposed to strong winds?

Specification

- Fabric - 320g Heavy duty Polyester
- Width - 835-1115cm

Essential Accessories

Repair Kits

Corsican repair kits
Blue
Burgundy
Green
Charcoal

Tuscany repair kit
All colours

Awning Hanger

A strong plastic and alloy hanger for use in tents, awnings, gazebo's or wardrobes

Veranda Poles

With quick release clamps and fabric protection patches at either end

Short 1.9m - 2.6m
Long 2.4m - 3.75m

Tie down kit

Specially designed for use with Pyramid's range of awnings. Also compatible with other manufacturers awnings. This extremely useful kit comes complete with springs, 2 sizes of buckles and storage bag

Metal tension pegs

This kit contains 15 heavy duty pegs with elastics, peg extractor/knocker and a sturdy lump hammer. Comes in a durable zipper bag for safe, clean and neat storage after use.

Awning tensioner

Ensure your awning or tent looks its best. Let the awning tensioner remove all that struggling and backache when applying tension to your awning or tent poles. Its easy to use trigger action and push button quick release reduces roof sagging and the need for 3 hands.

Pyramid

The name you can trust...

We're proud of our products at Pyramid, quality and perfection are what we strive for everyday so that you can enjoy a trouble free holiday in the great outdoors.

Supporting this is our dedicated after sales team who are always happy to take calls on any matter from how to correctly measure your caravan, ordering a replacement pole or dealing professionally and considerately with any other issues that may arise.
